Journal of Graph Theory

Contents of Volume 25, 1997

Number 1, May 1997

Open Problems of Paul Erdős in Graph Theory
F. R. K. Chung 3

Intersections of Longest Cycles in Grid Graphs
B. Menke, T. Zamfirescu, and C. Zamfirescu 37

On the Existence of Countable Universal Graphs
Z. Füredi and P. Komjáth 53

Decycling Graphs
L. W. Beineke and R. C. Vandell 59

Total Interval Number for Graphs with Bounded Degree
A. V. Kostochka and D. B. West 79

Subdivisions, Parity and Well-Covered Graphs
Y. Caro 85

Mean Distance and Minimum Degree
M. Kouider and P. Winkler 95

Information for Contributors I

Number 2, June 1997

Dominating Sets with Small Clique Covering Number
S. G. Penrice 101

Partition Graphs for Finite Symmetric Groups
M. Conder, M. Morton, and C. E. Praeger 107

Pebbling in Diameter Two Graphs and Products of Paths
T. A. Clarke, R. A. Hochberg, and G. H. Hurlbert 119

A Short Proof of Kuratowski's Graph Planarity Criterion
Y. Makarychev 129

VOLUME CONTENTS

A $\frac{1}{2}$-Transitive Graph of Valency 4 with a Nonsolvable Group of Automorphisms
D. Marušič and M.-Y. Xu **133**

Bounds Related to Domination in Graphs with Minimum Degree Two
L. A. Sanchis **139**

Minimal Embeddings in the Projective Plane
S. P. Randby **153**

A Counterexample to the Bold Conjecture
T. Sakuma **165**

Packing Almost Stars into the Complete Graph
E. Dobson **169**

Information for Contributors **I**

Number 3, July 1997

Independence and Hamiltonicity in 3-Domination-Critical Graphs
O. Favaron, F. Tian, and L. Zhang **173**

Star Partitions of Graphs
Y. Egawa, M. Kano, and A. K. Kelmans **185**

The Chromatic Number of Oriented Graphs
E. Sopena **191**

Coloring Precolored Perfect Graphs
J. Kratochvil and A. Sebő **207**

Hamiltonian k-Factors in Graphs
B. Wei and Y. Zhu **217**

Minimum Cycle Covers of Graphs
G. Fan **229**

Information for Contributors **I**

Number 4, August 1997

On Line Graphs of Linear 3-Uniform Hypergraphs
Y. Metelsky and R. Tyshkevich **243**

Degree Sums for Edges and Cycle Lengths in Graphs
S. Brandt and H. J. Veldman **253**

Avoiding Multiple Entry Arrays
A. G. Chetwynd and S. J. Rhodes **257**

A Weighted Generalization of Turán's Theorem
J. A. Bondy and Zs. Tuza **267**

Hamiltonian Paths and Cycles in Hypertournaments
G. Gutin and A. Yeo **277**

Integral Distance Graphs
J.-J. Chen, G. J. Chang, and K.-C. Huang **287**

Subgraphs with a Large Cochromatic Number
N. Alon, M. Krivelevich, and B. Sudakov **295**

Erratum **299**

Author Index **303**

Volume Index **I**

Information for Contributors **V**
